"LOVE CANAL AND THE POISONING OF AMERICA"
SUBJECT OF SCIENTIST'S SPEECH AT GW

WASHINGTON, D.C. — Dr. Dante J. Picciano, author of this year's Love Canal chromosome study, will speak about "Love Canal and the Poisoning of America" at George Washington University, room 101, Corcoran Hall, 725 21st St., NW, Wednesday, October 15 at 7:15 p.m. A question/answer period will follow the lecture. The public is invited to attend free of charge.

Picciano, director of the Houston-based Biogenics Corporation, is currently adjunct associate professor of genetics at GW, where he received his Ph.D. in genetics in 1973. With almost 30 publications in his field, Picciano has done research primarily in human cytogenetics, chemical mutagenesis and genetic toxicology.

From 1974 to 1978, Picciano was head of Dow Chemical Corporation's Medical Research Group. In 1978 he joined the Occupational Safety and Health Administration as director of Carcinogen Classification and Identification. When he arrived at Biogenics Corporation in 1980, he was commissioned by the Environmental Protection Agency to study possible chromosome damage to inhabitants near Love Canal in Niagara, N.Y.

Picciano's speech is being sponsored by GW's Graduate Genetics Program, chaired by Dr. Stefan O. Schiff.

PUBLIC SERVICE ANNOUNCEMENT FOR BROADCAST THROUGH NOVEMBER 28, 1980

REGISTRATION FOR GW PARALEGAL TRAINING FOR SENIOR CITIZENS (30 seconds)

George Washington University's Paralegal Training for Seniors is now registering for the winter session beginning December 1. If you are 55 years or older and want to learn how to help other senior citizens with legal problems, you may be eligible for this nine-month program designed especially for older persons. Courses focus on such topics as Social Security, Medicare, age discrimination and the child custody rights of grandparents. For registration information, call GW's Institute of Law and Aging at 676-4869. That's 676-4869.

GW LAW DEAN TO SPEAK AT COLORADO SPRINGS BREAKFAST

WASHINGTON, D.C. -- Jerome A. Barron, nationally recognized First

Amendment scholar and dean of George Washington University's National

Law Center, will be the featured speaker at a special breakfast for GW

law alumni in Colorado Springs, Saturday, October 11. Dean Barron's

speech, "A House for Our Future," will be given after the 8 a.m. breakfast
in the Carlton Room, Broadmoor Hotel, Colorado Springs.

Barron, a GW law faculty member since 1965, became dean of the National Law Center last year. He will discuss new ideas and programs for the law school, including the rebuilding of its physical plant.

HANDICAPPED AWARENESS MONTH AT GW

WASHINGTON, D.C. -- A performance by a troupe of deaf and hearing performers, "Reflections," who translate popular songs into sign language, mime and dance, begins handicapped awareness month at George Washington University on Thursday, October 9 at 4 p.m. This free performance will be held in the third floor ballroom, GW Marvin Center, 21st and H streets, NW.

Handicapped awareness month, which runs through October 31, includes workshops on attitudinal barriers to employment, films, sign language minisessions for beginners and updates and discussions of the Rehabilitation Act of 1973.

Oct 7/80

#### A RESOLUTION IN MEMORY OF JACQUELINE COCHRAN

The Board of Trustees of The George Washington University with deep sorrow makes record of the death on Saturday, August 9, 1980 of Jacqueline Cochran, a charter trustee of this institution since . She was a member of the Committee on University Development.

Born in Muscogee, Florida, around 1910 and orphaned as an infant, she was reared in a foster home. Although her formal schooling ended with third grade, she became internationally known as a business executive and aviatrix. In 1935, she began the manufacture of Jacqueline Cochran Cosmetics as a personally owned, incorporated business. By the early 1960s, it had become a major U.S. company.

Miss Cochran took her first flying lesson at the age of 22 and, in three weeks, earned her pilot's license at Roosevelt Field, New York. She subsequently took a year's training at Long Beach, California, the equivalent of a U.S. Navy course in groundwork and flight.

The first woman ever to fly faster than the speed of sound, she was one of the most accomplished women fliers of all time and set more than 200 records during her career.

Before the United States entered World War II, Miss Cochran served in the British Air Force Auxiliary. After Pearl Harbor, she returned to the United States, as director of women pilots on the General Staff of the U.S. Army Air Forces and as special consultant to the chief of staff, U.S. Army Air Forces. She was awarded the U.S. Distinguished

Service Medal in 1945.

Miss Cochran went to the Far East as a correspondent for <u>Liberty Magazine</u>, was present at the Japanese surrender in the Philippines and was the first woman to enter Japan upon the conclusion of hostilities.

Miss Cochran's autobiography, <u>The Stars at Noon</u>, 1953, received the annual book award of the Secondary Education Board of Boston.

Her record as an aviatrix is unsurpassed and her place in the history of aviation unique. She was honorary life president of the National Aeronautic Association, honorary president of the Federation Aeronautique Internationale and an honorary life member of the International Astronautical Academy.

Now therefore be it resolved that these words of remembrance for Jacqueline Cochran be entered upon the permanent record of the Board of Trustees of The George Washington University in testimony of the Board's deep appreciation of her interest in and contributions to the work of the Board.

Be it further resolved that a copy of this resolution be delivered to her family, that its members may be mindful of the high esteem in which Jacqueline Cochran was held in the George Washington University community.

#### VINCENT JAMES De ANGELIS

WASHINGTON, D.C. — Vincent James De Angelis, professor emeritus of physical education at George Washington University, died at Sibley Hospital on Sunday, October 5, at 10:10 p.m. of complications resulting from treatment for cancer. He was 68 and a resident of Arlington, Va. (North Peary St.).

Born in Brooklyn, N.Y., he attended Erasmus Hall, a high school in Brooklyn, where he starred in football, baseball and indoor track. He came to George Washington as a freshman in 1935 and was graduated in 1939 with the degree of B.S. in P.E. He received the M.A. in Ed. in 1948. A member of Omicron Delta Kappa, leadership honor society, he received the ODK award in 1939 as the outstanding senior of the year. He was a member of Tau Kappa Alpha social fraternity and was listed in Who's Who in American Colleges and Universities. He was elected to the GW student hall of fame in 1939. He played a year of varsity football, three years on the Colonial baseball squad, and was captain of the team in 1936. After graduation in 1939, he became manager of the student club, the university's first student union, until he was called up by the Air Corps in 1942. He served as a physical training officer in the Eastern Flying Training Command. He left the service as a captain in 1946. That same year he became the first manager of GW's Lisner Auditorium,

a position he held until 1948 when he was named assistant business manager for the university.

In 1949, he was appointed assistant professor of physical education. Shortly afterward, he was recalled to the Air Force during the Korean War and served as a special services officer in the Military Air Transport Service (MATS) until January, 1953, attaining the rank of lieutenant colonel. He returned to George Washington and progressed through the professorial grades. In 1961 he was named full professor of health, physical education and recreation. He was chairman of the Department of Health, Physical Education and Recreation from July, 1966, to August, 1969. In addition to his faculty responsibilities, he served as varsity baseball coach for three years and as director of intramural sports for 15 years. He was a member of the GW Faculty Senate, an advisory body to the president, for four terms from 1963 to 1972. He retired from the university in 1974, receiving the status of professor emeritus and a citation praising "his superlative gifts as a teacher and adviser" at the spring commencement on May 5.

Professor De Angelis was secretary-treasurer of GW Lettermen's Club, a member of Phi Kelta Kappa educational fraternity, the American Association of University Professors, GW's Luther Rice Society and the Society of the Emeritii. He received the GW Alumni Achievement Award in 1946 from the university and the GW Alumni Service Award in 1974 from the General Alumni Association. He was an affiliate member of the Cherrydale United Methodist Church.

He is survived by his wife, the former Eleanor Isbell of Washington, D.C., two sisters, Mrs. Alfred (Mae) Cavalier of Long Island, N.Y. and page three of three

Mrs. Frederick Grofsick (Florence) of Pompano Beach, Fla.; and two brothers, John De Angelis of Gardnerville, Nev., and Michael De Angelis of Hiawassi, Ga.

Funeral services will be held at the Arlington Funeral Home, 3901 North Fairfax Drive, on Thursday, October 9, at 1 p.m.

Contributions may be sent to the Vincent De Angelis Memorial Fund, 701 Gelman Library, George Washington University, Washington D.C. 20052.

#### FOR IMMEDIATE RELEASE

CENTER FOR TELECOMMUNICATIONS STUDIES ESTABLISHED AT GW

WASHINGTON, D.C. -- In response to the rapid growth of the telecommunications industry in the Washington area, George Washington University has established the Center for Telecommunications Studies. The multidisciplinary center is planned to encompass a broad spectrum of teaching and research activities geared to the telecommunications needs of industry and government. Academic and policy guidance is provided by a steering committee composed of deans of GW's various colleges.

To assist the steering committee in identifying educational needs and emerging research requirements, an advisory council has been formed composed of leaders in telecommunications activities in government and industry. The members of this council largely represent organizations which have urged the forming of the center. (A list of advisory council members is attached.)

The council's first meeting with the steering committee will be a noon luncheon on Monday, October 27, in the George Washington University Club, third floor Marvin Center, 800 21st St., NW.

Located in Washington, where there has been a marked trend towards concentration of the communications and electronics industries, the center is conveniently close to federal regulatory and policy-making

bodies. Educational programs sponsored by GW schools and colleges and coordinated through the center will be held at industry and government sites convenient to metropolitan Washington's communications community. The programs will cover:

- -- Technology
- -- Regulatory and legal aspects of telecommunications
- -- Public policy issues
- -- Management and administrative aspects of telecommunications.

Directed by GW Research Professor of Engineering Peter M. Kelly, the center cooperates with several GW schools in offering three separate master's degree programs: the Master of Science in Special Studies from the Graduate School of Arts and Sciences, the Master of Science in Telecommunications and Computers from the School of Engineering and Applied Science, and the Master of Public Administration from the School of Government and Business Administration.

The center has been established in close cooperation with GW's School of Engineering and Applied Science, which offers degrees up through the doctorate level in engineering and scientific areas relevant to telecommunications. The center also draws upon the talents of those people in other institutes (such as GW's Institute of Information Science) to help achieve a central focus for the university's multidisciplinary research and educational requirements in telecommunications.

EXHIBIT: FABRIC ART CONCEPTIONS BY MARIA DA CONCEICAO

WHO: MARIA DA CONCEICAO

WHAT: FABRIC ART CONCEPTIONS

WHEN: WEDNESDAY, OCTOBER 15, THROUGH FRIDAY, NOVEMBER 14

WHERE: 3rd FLOOR GALLERY, MARVIN CENTER, GW

800-21st STREET, N.W.

WASHINGTON, D.C.--The most recent fabric wall hangings by Maria da Conceicao, noted Washington fibre artist, are the core of the exhibition "Fabric Art Conceptions" which will be on display in the 3rd floor gallery of GW's Cloyd H. Marvin Center at 800-21st Street, N.W. through Friday, November 14.

The wall hangings of sewn and appliqued fabric with landscape themes done in the last year are on view along with antique dolls dressed in fanciful costumes of lace, feathers and veils, floating suspended in the gallery's newly renovated and lighted cases. Two pieces of wearable art (clothing) are displayed as well as selected watercolor designs for the fabric "scapes" and the wearables.

Maria da Conceicao, who is called Sao, had her first Washington exhibition in GW's Dimock Gallery in 1975 in a group show called "Inner Explorations."

Since then, she has become nationally and internationally known and her work

was shown in April at the American Center for the Arts in Paris. A native of Evora, Portugal, she learned traditional skills of sewing, embroidery, crochet and knitting in a convent. She moved to Denmark in 1964 and studied fine art and textile design at the Danish Handcraft Guild, later working for the guild professionally. Sao taught at the Smithsonian Institution for two years (1977-79) giving instruction in techniques of wearable art: the use of applique, embroidery, crochet and beads in creating artistic clothing. In 1979, she was given a special award by the Portuguese Cultural Foundation Inc. for outstanding accomplishment in the field of art.

Her works have been exhibited at the Washington Project for the Arts,

International Monetary Fund, Washington County Museum, Vatican Museum, the

Foundry Gallery, and the Textile Museum. Wearable Art--Innovative Designs for

Clothing and Fibers (Viking Press, 1979) is a studio book devoted to Sao's work.

The 3rd floor gallery in the Marvin Center, 800-21st Street, N.W., is open to the public from 7 a.m. to 11:30 p.m. Sunday through Thursday and from 9 a.m. to 12 midnight Friday and Saturday.

Lloyd H. Elliott President George Washington University October 16, 1980

STATEMENT TO THE UNIVERSITY COMMUNITY

ON INFLATION AND THE PROPOSED TUITION INCREASE

This fall has been a time of reflection and genuine concern among those responsible for the financial and academic future of this university.

We are faced with the prospect that, unless new income is forthcoming, increasing operating deficits will wipe out all reserves in the non-medical side of the university's budget.

As many students are aware, GW's tuition to date has been kept below tuition rates at other private universities in the area and across the country. That tuition will rise substantially above the \$3,700 plotted for fall 1981 is certain. Just how much we don't know at this point, but it is evident we can no longer afford to offer the bargain in tuition we have been offering for the past several years. Our thinking has included increases ranging from \$200 to \$600.

We must make these adjustments to avoid being inundated by a tidal wave of inflation and to protect the quality of education we offer here. That's the negative side, but we should look at the positive aspects as well.

These upward adjustments in budgeted income will make a number of benefits possible.

--It is clear that we haven't provided funds to increase salaries anywhere near the increases produced by inflation. While we're no

different from other institutions across the country in this respect, we must do as much as we can for our faculty and staff without penalizing students unduly. We need to ensure retention of able younger faculty members and to attract new faculty of high quality as the need arises.

We'll be able to increase salaries generally by 10 percent next year. We've also made provision for increasing salaries of non-academic personnel in the lower grades (2 through 9), where inflation hurts the most, by an additional 3 percent on the average. Junior faculty-instructors and assistant professors in Columbian College, the Graduate School of Arts and Sciences and the Schools of Education and Human Development and Public and International Affairs--will benefit similarly.

--The additional increase in tuition income will permit some improvement in the quality of facilities. For example, we'll be able to go ahead with a four-year project to upgrade chemistry laboratories in Corcoran Hall, and Gelman Library will receive much-needed funds for books and periodicals. It will also help maintain and operate the Academic Cluster and provide funds to retire the revenue bonds which the university will issue to finance the cluster.

--Most importantly, I should emphasize that while tuition will rise significantly, those of our students who are least able to afford the cost of a GW education, scholarship students, will not be affected by the increase. Funds budgeted to pay for their tuition will be increased accordingly.

On the horizon are other positive events. One commercial project currently under construction, the extension of the Joseph Henry Building on Pennsylvania Avenue, and a second now going through the governmental page three of three

approvals process, the 2000 Pennsylvania Avenue project, will increase income to the university. Development of the property on which the old medical school was located in downtown D.C. will also take place in the foreseeable future. We are proceeding with deliberate speed on all of these projects and we will realize additional income as they come into use.

In making these adjustments to combat the effects of inflation, we should make sure that we do not lose sight of our objectives: to protect our students' education, to balance our needs with our income, to safeguard the financial well-being of our faculty and staff to the extent we are able, and to maintain our position of leadership in higher education.

Expenses for patient care, \$59,757,285, include only those costs associated directly with treating the patient, i.e., dietary, nursing, and medical care, including ancillary services such as radiology and pathology. Most of the reported expenses for administration and general (\$14,339,007) and maintenance and operation of plant (\$9,045,469) must be incurred to provide an appropriate setting for direct patient care. These indirect expenses, as well as the direct expenses, are recovered through charges to patients and included in patient care revenue of \$82,223,667.

TEN YEARS IN THE LIFE OF A UNIVERSITY REFLECT SOCIETY'S CHANGES

WASHINGTON, D.C. — Energy, the environment, recycling, access for the handicapped, concerns about social injustice — all areas on the fringe of the establishment in 1970 — have, in 1980, become a part of the curriculum or business practice at a Washington, D.C., university not far from where protests over many of those same issues came to a head a decade ago.

These and other changes in the last 10 years are the focus of "Where We're Going, Where We've Been," George Washington University's 1980 Annual Report. Highlights of the report, presented to the GW Board of Trustees at its October 16 meeting, follow.

- GW students of the 80s, unlike those of the early 70s, are concerned about their careers and finding a niche in the establishment. Administrators attribute the shift to the economy and a tightening job market.
- More students are seeking professional degrees and want parttime jobs in their fields to make their skills more marketable. Students have become activists in the job search.
- In its business practices, the university, its students and employees actively pursue energy conservation, paper recycling, historic

preservation of certain buildings, awareness of the handicapped through accessibility programs and services, and special community assistance with services such as medical and legal aid for the aging.

- In the undergraduate curriculum, which retains a strong liberal arts emphasis, 16 new majors reflect changes in society over the last decade. GW now has studies in Middle Eastern and East Asian areas, the environment and urban affairs. Experimental courses take students into the community to help define neighborhood problems or document community history. Interdisciplinary programs thrive at all levels. One of the most visible is GW's Center on Aging Studies and Services at St. Mary's Court, a housing project for senior citizens near the campus where students in law, medicine, recreational therapy and physical fitness training come together for educational purposes and for the benefit of the residents.
- GW administrators remain optimistic, despite declining enrollments in higher education nationally, about the ability of the university to succeed in difficult times because of a highly competitive tuition structure and because of its location in Washington.

#### FOR IMMEDIATE RELEASE

WASHINGTON, D.C. -- The proposed 1981-82 budget and tuition rates were reviewed by George Washington University's Board of Trustees at its fall meeting October 16.

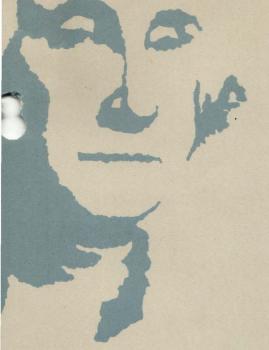

In a report to the board on the status of the non-medical general budget, Director of Planning and Budgeting William D. Johnson said that funds have been provided to increase salaries at GW by 10 percent beginning July 1, 1981.

Additional provisions call for non-academic personnel in lower grades and junior faculty in Columbian College, the Graduate School of Arts and Sciences and the Schools of Education and Human Development and Public and International Affairs to receive an extra 3 percent raise. Non-salary allocations would be increased by 7 percent.

Funding the \$103 million budget will require a substantial tuition increase beyond the \$3,700 undergraduate tuition (for two semesters) currently projected for fall 1981. In a statement to the university community October 16 (ATTACHED), GW President Lloyd H. Elliott termed the upward tuition adjustment one which must be made 'to avoid being inundated by a tidal wave of inflation and to protect the quality of education we offer here at GW. We are faced with the prospect," he said, "that unless new income is forthcoming, increasing operating deficits will wipe out all reserves in the non-medical side of the university's budget."

Though the proposed tuition increase is under discussion in committee, it would not come before the full board until January 1981.

The board did move, however, to approve tuition of \$134 a credit hour for study in the 1981 Summer Sessions, a \$17 increase over summer 1980 tuition.

MEMO TO: Assignment Editors

RE: Ted Sorenson Lecture at GW

Theodore Sorenson, former special counsel to President Kennedy and author of "Decision-Making in the White House," will speak on "Foreign Policy in the 1980 Presidential Election" at George Washington University on Wednesday, October 29, at 5:30 p.m. A reception follows the discussion in GW's Marvin Center, room 413-414, 800 21st St., NW.

Sponsored by GW's Public Administration Master's Student Association (PAMSA), this lecture is one of a series of monthly policy forums on subjects of national interest. Founded in 1977, PAMSA provides 274 GW graduate students in the department of public administration with a monthly newsletter, "PA Paradigm."

LOBBY, 18th and F STREETS, N.W.

HOURS: DIMOCK GALLERY, 10 A.M. TO 5 P.M. MONDAY THROUGH FRIDAY

GENERAL SERVICES ADMINISTRATION, 7:15 A.M. TO 5:30 P.M.,

MONDAY THROUGH FRIDAY

WASHINGTON, D.C. -- Works by George Washington University art students, graduate and undergraduate, will be on exhibition in two locations from Thursday, November 13, through Wednesday, December 3. The locations are the GW Dimock Gallery, off the lower lounge of Lisner Auditorium 21st, and H Streets, N.W., and the General Services Administration (GSA) Central Office Building Lobby at 18th and F Streets, N.W.

Art forms in the exhibition will include drawing, painting, photography, ceramics, design, printmaking, sculpture and visual communication. Some of the works will be for sale.

The GW students' works are being shown at the GSA under its Living Building

Program, a policy of making federal buildings more accessible to the community under

Title I of Public Law 94-541, item 4. Various universities will be using GSA's lobby area and exhibit cases. George Washington is the first to be invited.

Hours at the Dimock Gallery will be 10 a.m. to 5 p.m. Monday through Friday and at GSA 7:15 a.m. to 5:30 p.m., also Monday through Friday.

MRS. DORIS FRANCO GLANDEN, right, of Landover, Maryland, talks with Lenore D.

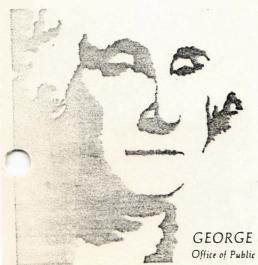

Miller, curator of art at George Washington University's Dimock Gallery, left,
and Gail Mishkin, assistant curator. Mrs. Glanden Loaned a number of art
objects for the Dimcok Gallery's current exhibition, "Themes and Images in
Pre-Columbian Art." The gallery, off the lower lounge of Lisner Auditorium,
GW, 21st and H Streets, N.W., Washington, D.C., is open to the public from 10 a.m.
to 5 p.m. weekdays. The exhibition continues through Friday, November 7.

TODD BLUDEAU, son of Mrs. Sally Bludeau of Lost Mountain Manor, Rochester,

New York, is photographed with memorabilia from his summer study in Bulgaria.

He was one of 250 students and professors from 27 countires who participated in the yearly summer seminar for Bulgaristics held in the Bulgarian capital, Sofia.

He is holding a book, Problems of Language Culture, a compilation of articles.

The triangular wooden box holds a set of Bulgarian dominoes. The table coverings are typical textiles. Todd wears a T shirt with the theme "Experiment Rainbow," which celebrated the flight of the first Bulgarian cosmonaut in 1970. The dancing folk dolls stand near several books of short stories and a table tennis paddle from Ho Chi Minh City sold in Bulgaria. Now a candidate for a master's degree in Slavic languages at George Washington University, Washington, D.C.,

Todd is also a GW graduate teaching assistant. He did his undergraduate work at the University of Rochester.

VOLCANOES IN AMERICA: DEAD, DORMANT OR DANGEROUS?

SUBJECT OF FREE LECTURE AT GW

WASHINGTON, D.C. -- Mount St. Helens continues to erupt, casting doubts on the dormancy of America's numerous other volcanoes. If you are curious about this subject, come to a free lecture at George Washington University on Wednesday, November 5 at 8 p.m. Listen to an expert, Dr. Anthony G. Coates, GW professor of geology, speak on "Volcanoes in America; Dead, Dormant or Dangerous?"

The First Wednesday Lecture Series, of which Dr. Coates' presentation is a part, is held each month in rooms 410-415, 4th floor, GW's Marvin Center, 21st and H Streets, NW. To ensure seating, those planning to attend should call the Alumni Relations Office at least a day in advance at (202) 676-6435. The public is cordially invited to attend.

MEMO TO ASSIGNMENT EDITORS

FROM: Diane H. Rush, News Manager (676-6464)

RE: Election Experts

With the presidential election nearing final countdown, you may be looking for comment on the electoral process, the influence and role of the media in elections and related topics. The following three GW professors are valuable resource persons.

<u>Dr. William C. Adams</u>, assistant professor of public administration, heads the Television and Politics Study Program in GW's School of Public and International Affairs. He has written several major articles on television and politics and a book entitled, "Television Network News: Issues in Content Research." Next spring Dr. Adams will head a national conference at GW on media coverage of the 1980 presidential campaign.

Office: 676-7494. Home: 548-7359.

Dr. Michael J. Robinson, project director of the Media Analysis

Project at GW, has been studying CBS Evening News and wire service

coverage of the presidential campaign. His research findings were

picked up by the New York Times news service and published nationwide,

and he has been interviewed by national television networks. Office: 676-6441.

Home: 547-8830.

<u>Dr. Stephen J. Wayne</u>, professor of political science and author of the recently published book, "The Road to the White House: The Politics of Presidential Elections," has taught courses in the American presidency, the legislative process, the policy-making process and the psychology of politics at GW for 11 years. His widely acclaimed book discusses organization, strategy and tactics of the recent presidential campaigns, as well as image building and media politics. Office: 676-6294.
